

Orthotics

Product Catalog

Fillauer[®]

Fillauer®

1914

George Fillauer Sr., a German immigrant, opens the Red Cross Pharmacy in Chattanooga, Tennessee.

George Fillauer Sr.

1920 - 1930s

Red Cross Pharmacy, now Red Star Pharmacy, expands its services and hires German "orthomeister" Lawrence Porten to provide orthotic and prosthetic devices for veterans returning from World War I.

George's sons, George Jr. and Carlton, join the company. George Jr. becomes a pharmacist and Carlton an orthotist-prosthetist.

Top: Red Star Pharmacy with George Fillauer Sr. and sons George Jr. and Carlton

Bottom: Lawrence Porten and Carlton Fillauer fitting a patient

George Fillauer Jr. and Carlton Fillauer

1940s

Carlton Fillauer becomes the first staff prosthettist named to the National Research Committee on Prosthetic Devices before returning to Fillauer Drug & Surgical Supplies in 1949.

1950 – 1960s

Carlton Fillauer is among the first class of practitioners to be certified by the American Board for Certification in Orthotics and Prosthetics (ABC) and was a charter member of the American Academy of Orthotists and Prosthetists (AAOP). In 1955, George Sr. retires and George Jr. takes over as president.

Carlton also serves as president of ABC in 1957 – 1958 and president of AOPA in 1962 – 1963.

1972

Fillauer merges with pharmaceutical and surgical company Durr Drug. The merge provides Fillauer with expansion and sales growth in surgical and orthopedic supplies.

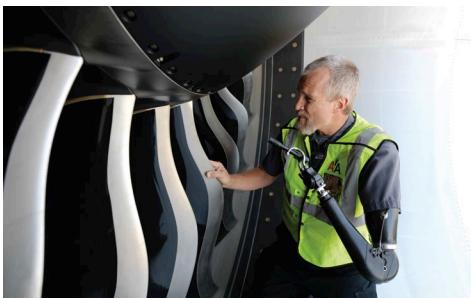

DURR-FILLAUER MEDICAL, INC.

1993

Bergan Brunswig Corp., now Cardinal Health, acquires Durr-Fillauer in a hostile takeover seeking its pharmaceutical and surgical supply divisions. Karl Fillauer and a group of investors purchase the orthotic and prosthetic divisions to form Fillauer, Inc.

Top: The Hosmer 5XA Hooks

Bottom: The Motion Control ETD and Hybrid Arm

1996 – 1999

Fillauer begins a steady expansion, acquiring such companies as Hosmer, in 1996, and Motion Control, in 1997, which collectively brings in a strong upper-extremity product line, both body powered and myoelectric. The Center for Orthotic Design, acquired in 1999, develops a new version of the reciprocating gait orthosis.

Trautman Bench Carver

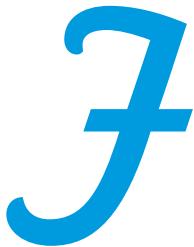

Dynamic Walk

PDQ® BT-4 Oven

AllPro Foot

2000s

Fillauer continues expansion, acquiring Swedish-based Centri AB in 2002, adding gloves, liners, and protective leg coverings, in addition to other orthotic and prosthetic components. In 2005, the Trautman™ equipment line is added to Fillauer LLC. In 2008, Fillauer started Emotis, its first joint venture, which uses advanced composite materials to produce prosthetic feet. Most recently, in 2009, Fillauer purchases OTS Corp., a high-end provider of orthotic componenetry, including the StepLock knee joint, and PDQ® Ovens for O&P fabrication.

2017

Today, Fillauer's mission is to be a leader in the evolution, design, and technology of orthotic and prosthetic products and services that empower clinicians and patients to achieve their best functional outcomes.

Led by the fourth generation, Michael Fillauer, CPO/L is President & CEO of Fillauer Companies, Inc. where he and his brother David Fillauer serve on the board. Fillauer encompasses Fillauer LLC, Motion Control, Fillauer Composites (formerly Emotis), Fillauer North Carolina (formerly OTS Corp.), Fillauer Europe (formerly Centri), and Fillauer Orthotics and Prosthetics.

Fillauer US Limited Warranty

Fillauer items under warranty will be replaced or repaired (at Fillauer's discretion) at no charge, if the matIn the event of a defect, malfunction or other failure of the product during the warranty period, not caused by any of those items set forth in Exclusions below, Fillauer shall quickly remedy such failure or defect within a reasonable period of time. The remedy shall consist of repair or replacement of the product at Fillauer's sole discretion. Replacement units may be either new or reconditioned units in near-new condition. Determination of the damages or defects to be covered under the Limited Warranty shall be made by Fillauer. The customer is responsible for shipping costs to Fillauer, and Fillauer shall pay return shipping costs to customer. Consumables are not warranted.

Exclusions

The warranty does not include:

1. Wear and tear.
2. Use, fabrication or installation outside Fillauer's recommendations.
3. Orthotic and Prosthetic services for fitting and maintaining the orthosis or prosthesis made and used with the equipment.
4. Damage caused by neglect, misuse or improper operation.
5. Damage due to accident, fire, water, vandalism, unsuitable environmental conditions, or parts not approved or recommended by Fillauer.
6. Modifications to the product which occur during the warranty period except by mutual consent of the parties in writing.

Orthotic and Prosthetic Components, Equipment, and Custom Fabrication Items

are warranted for 12 months from the date of shipment from a Fillauer warehouse or from an authorized Fillauer distributor with the following exceptions:

Oven heating elements, Suspension Sleeves and Silicone Gloves

are warranted for 90 days from the date of shipment from a Fillauer warehouse or from an authorized Fillauer distributor.

Prosthetic Liners, Dream Skin, Cosmetic Gloves, Tools, and Trautman Accessories

are warranted for 6 months from the date of shipment from a Fillauer warehouse or from a Fillauer authorized distributor.

Hosmer Hooks and Elbows, Motion Arm, Utah Arm, E2 Elbow and ProControl 2

are warranted for 24 months from the date of shipment from a Fillauer warehouse or from a Fillauer authorized distributor. Extended warranties of two years are also available.

Repairs

made by Fillauer are warranted for 90 days from the date of shipment from a Fillauer warehouse or from a Fillauer authorized distributor.

Feet

are warranted for 12, 24, or 36 months from the date of patient fitting.

12 months: Obsidian Blades

24 months: Formula

36 months: AllPro, AllPro XTS, Aeris Performance 2, Aeris Performance LP, Ibex XD, Element, and Wave Comfort 3

Foot Shell and ProCover

are warranted for 9 months from the date of patient fitting.

Taska™ Hands

are warranted for 3 years from the date of patient fitting. Extended warranties available.

Returns, Adjustments, and Credits

- Inspect all goods immediately upon receipt for damage or errors in shipping.
- Call Customer Service within five business days in the event of errors or damage.
- Prior approval and an RMA number must be obtained from Customer Service before goods may be returned.
- Returns must be accompanied by a copy of original invoice, order number, or PO number. The return authorization number, provided by Customer Service, must appear on the shipping label.
- Credit for returned merchandise is subject to inspection and may be subject to a 15% restocking fee for merchandise in resalable condition if returned within 90 days.
- No credit shall be issued for goods returned after 90 days.
- No credit shall be issued for equipment, custom or special order items, including Taska Hands.
- No credit shall be issued for non-stock items returned after 30 days.

Dynamic Walk, Custom Made

The Dynamic Walk Custom Made is recommended for patients in need of something utterly special or when the Standard or Single Side features will not fit correctly. Whether the need is for a customization of the lifting force or size, Fillauer's Dynamic Walk can be custom made to fit perfectly.

Please send us:

- Positive Cast
- Negative Cast
- Positive Foam, please contact Fillauer prior to order
- Completed measurement form on page 57 or 58

Product Features

- Customizable size and lift
- Pediatric sizing available
- Perfect fit from patient cast
- Lightweight and high strength
- Order form on page 57 or 58

Custom Pediatric Dynamic Walk

Custom Adult Dynamic Walk

Ordering Information

Description	Product Number
Custom Dynamic Walk	700100100

*add this product number when sending negative cast or foam

Casting Instructions

Positive Cast

- Calf at a 90° angle to the horizontal plane with the foot at required heel height (standard 10 mm)
- Make the cast 50 mm longer than desired height of the orthosis
- Strengthen the positive cast with an all through reinforcement
- Mark the calf's midpoint and eventual pressure points / sensitive areas on the finished cast
- Fill out order form on page 57 or 58 thoroughly

Negative Cast

- Calf at a 90° angle to the horizontal plane with the foot at required heel height (standard 10 mm)
- Make the cast 50 mm longer than desired height of the orthosis
- Be gentle when casting to avoid creases and other irregularities, especially around toe area to ensure proper fitting
- Strengthen the negative cast by adding at least two layers of plaster
- Mark eventual pressure points or areas to take into special consideration when producing the orthosis
- Fill out order form on page 57 or 58 thoroughly

Dynamic Walk, Shoe Mount

Specifications

Materials: TFC, PEEK

Product Features

- Available with custom height
- Lightweight and high strength
- Assemble yourself or let us do it for you

Orthosis before assembly

Shoe not included

Size	Length	Height	Calf Circumference
Small	6.5 in. (165 mm)	13.4 in. (340 mm)	9.4 – 13.0 in. (240 – 330 mm)

Reciprocating Gait Orthosis

RGO Overview

An orthotic solution that provides ambulation for the client who is unable to stand and/or walk due to total or partial loss of function of the lower extremities. All designs can be used with either internal or external KAFOs

Applications: Child through adult

Horizontal Cable Design

- This design offers cosmetics with a low maintenance style. The Horizontal Cable design can be used with either a thermoplastic or a rigid pelvic band of standard or butterfly style.
- The design is often combined with a molded plastic LSO (lumbo-sacral orthosis) or TLSO (thoraco-lumbo-sacral orthosis) jacket, depending on the level of the lesion or control desired.
- Page 21 – 28

Rocker Bar Design

- The Rocker Bar design is the heavy duty alternative. It offers a very strong mechanism with a thicker Rocker Bar reciprocator that is welded to the sidebars.
- Maintenance free with very low friction makes it a very good choice for clients with no control or very low control of the lower extremities.

R. Turnbuckle Assembly

Manufactured in the United States

Manufactured in Sweden

Horizontal RGO Cables

Product Features

When fabricating the Horizontal Cable System, it is impossible for orthotists to predict the necessary length of cables. Fabricators must complete the basic structure, then measure to determine which length of cables are needed. The cable starter kit provides orthotists with a selection of cables on hand helping to avoid lengthy assembly processes.

Integrated Ankle Joint, Double Action

Product Features

- Dorsiflexion and/or plantar flexion assist and stop
- Nickel plated aluminum for corrosion resistance
- Includes all mounting hardware, stirrups, and alignment fixture

Ordering Information

Description	Small	Medium	Large
Integrated Ankle Joint - Double Action	IA-CH-DA-AL	IA-YTH-DA-AL	IA-AD-DA-AL

Double Adjustable Ankle Joint

Ped

Product Features

- Taller, reversible stainless steel upright helps to corrugate plastic strut, reducing the need for thicker plastics
- Adjustable stops allow movement from 0° to 30° in both directions
- Ultra-small joint head to reduce overall bulk
- Super low-profile at just over 1/4 in. thick (lower profile than most polyurethane hinges)
- Contourable, distal stirrup attachment increases strength of connection to molded footplate

Specifications:

Material: Stainless steel

Thickness: 0.25 in. (6 mm)

Weight: 1.5 oz. (43 g)

Ordering Information

Description	Size	Weight Rating	Product Number
Double Adjustable Ankle Joint	Small	50 lbs. (23 kg)	DAAJ1
Double Adjustable Ankle Joint	Large	80 lbs. (36 kg)	DAAJ2

Split Tail Stirrups

Product Features

- Unique "Y" shape of the split-tail is perfectly suited for use in plastic NYUCB shoe insert configurations
- Special order drilled or drilled and tapped
- Sold in pairs
- For use with Integrated Ankle Joints

TFC Orthotic Uprights

Product Features

- Stronger and lighter than conventional metal uprights
- Thermoformable contouring using heat gun or oven
- Accommodates smaller radii bends
- Increased stiffness and flexibility of carbon composite
- Will not corrode unlike conventional metal uprights
- Uses innovative post pre-preg carbon material
- Optimized attachment plates for conventional metal joints
- Half oval

Knee Extension Assist

Product Features

- Can be mounted to most knee joints
- Provides extension force through a range of flexion angle degrees and assurance that knee joint reaches full extension
- Aids patients with weak knee extensor musculature to achieve improved function
- Helps ensure optimum function of orthotic knee joints
- Design features let-off/break-over at 35° of flexion, allowing the patient to bend the knee without extension force being applied to the seated position

Steplock®

Specifications

Materials: Aluminum and stainless steel

Product Features

- Steplock® orthotic joint offers the patient security throughout the range of motion
- Perfect joint for treating a flexion contracture
- The joint has 9 different positions, locks in flexion and allows movement in extension
- Release kit available, see page 48
- Straight – medial and lateral straight
- Left medial offset (pairs) – left medial contoured, lateral straight
- Right medial offset (pairs) – right medial contoured, lateral straight
- Double contour – medial and lateral contoured

Close Contour Pediatric Knee Joint

Ped

Product Features

Materials: Nickel plated alloy construction

Product Features

- Miniature, pediatric Steplock® knee joint
- 120° range of motion with 9 intermediate locking positions
- Can be contoured within $\frac{1}{2}$ in. (12 mm) of knee center
- Innovative lock retainer allows free motion

Ordering Information

Description	Product Number
Close Contour Joint Pairs – Steplock, 4.5	CC4-5SL

Close Contour Elbow & Wrist Joint

Product Features

- Elbow extension ratcheting or reversed for flexion ratcheting
- Wrist ratcheting from 90° flexion to 30° extension
- Includes free motion bar joint for opposite side
- Steplock features a built-in lock retainer
- Unparalleled strength to weight ratio with OTS alloy
- Nickel plated finish for durability

Ordering Information

Description	Left Lateral	Right Lateral
Extension Elbow	CC4ESL-LT	CC4ESL-RT
Reverse Elbow (flexion)	CC4RSL-LT	CC4RSL-RT
Wrist	CC4WSL-LT	CC4WSL-RT

Release Kit, SBK

Product Features

- For use on original series Steplock® only
- Features a soldered stainless steel bail (joints, uprights, plastics not included)

Ordering Information

Description	Product Number
Bail Kit for Regular Step Lock, IL	SBK

Lever Release Kit, LRK

Product Features

- The lever release kit provides a remote-operated unlocking mechanism that connects the medial and lateral joints, making it easier to lock and unlock any spring-loaded joint (joints, uprights and plastics not included).
- Easy to fabricate

Ordering Information

Description	Product Number
Fits the Interlock and Steplock size $\frac{3}{16} \times \frac{1}{2}$ in. (5 x 12 mm)	LRK512SM
Fits the Interlock and Steplock all size except size $\frac{3}{16} \times \frac{1}{2}$ in. (5 x 12 mm)	LRK1619

700100100 Custom Dynamic Walk

Please specify:

- Right Foot Left Foot Bilateral

Choose Options

- Carbon standard layup: same as off the shelf version
- Reinforced foot plate for increased durability
- Reinforced calf band for increased durability
- Custom foot orthotic (+ \$40)
- Additional PEEK rods (+ \$50)

- Would you like us to contact you prior to fabricating the brace?

Notes _____

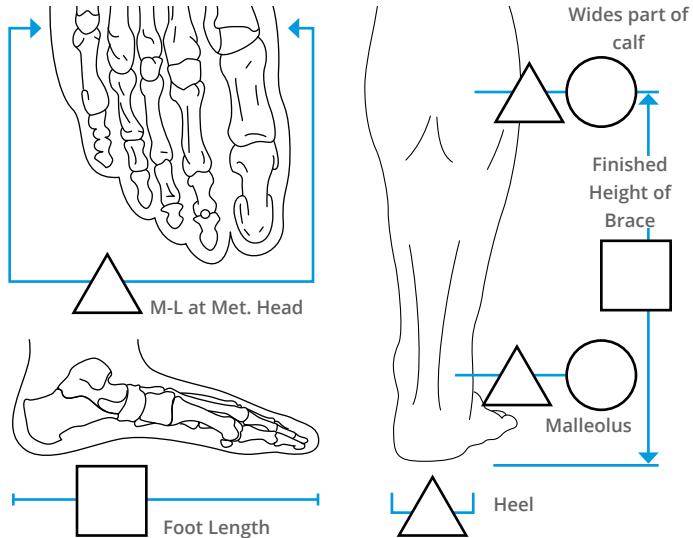

Mold Type

Negative cast, insole tracing, and measurement form preferred.

- Positive cast
- Negative cast
- Modified positive cast
- 3D Scan (.stl, .xyz, .obj, .op3 file types accepted)

Please note that if non-standard trim lines are not indicated, then standard trim lines will be applied.

Please fill in all of the measurements below

Casting Instructions

- Include a tracing of the Insole of the shoe to be used.
- Please mark the desired height of brace on the finished cast.
- Patient should be weight bearing, standing straight with upright posture when casting. The calf needs to be at a 90° angle to the horizontal plane with the foot at the required heel height. The patient needs to be casted up to the tibial tuberosity.
- Please mark the pressure points or any areas we should avoid covering on the positive or negative cast.

The diagram illustrates a leg from the knee down to the foot. A vertical line represents the leg's axis. Five horizontal blue lines extend from the left side to mark specific points: 'Fib. Head', 'Widest Calf', 'Mid Calf', 'Above Ankle', and 'Ankle'. Each point is indicated by a circle containing a triangle. A vertical blue line labeled 'Height Fib.' extends from the top point to the bottom of the leg. At the bottom, there is a small triangular icon pointing upwards.

All measurements MUST be provided.

Casting Requirements

Fillauer recommends a segmental casting technique with footboard.

1. Cast Foot and Ankle in desired position.

2. Cast Knee and Thigh in desired position.

IMPORTANT: When casting, add 5° of knee flexion to the patient's full range of knee extension; this will allow proper locking and unlocking in the SPL2. This casting method will ensure the SPL2 always comes to full extension BEFORE the leg comes to full extension.

Example:

- Full extension at 0° - Provide Cast at 5° Flexion
- Full extension at 5° - Provide Cast at 10° Flexion
- Hyperextension at 5° - Provide Cast at 0° Flexion

To find knee center:

Divide approximately half the distance between the adductor tubercle and the medial tibial plateau (MTP) to find the mechanical knee center.

Cast Mold Corrections

Ankle

- Please correct forefoot to _____
- Please correct hindfoot to _____
- No Corrections, casted in correct position

Knee

- Please correct, set knee hinges at 0°
- Please correct, set knee hinges at _____° of flexion
- Please correct, set knee hinges at _____° of hyperextension
- No Corrections, set knee hinges at casted position

Orthotist Evaluation of Mold

Patient Information

Diagnosis	Weight
Patient ID	Height
Age	<input type="checkbox"/> Fabricate Complete RGO
Sex	<input type="checkbox"/> Fabricate Pelvic Section Only

- Provide all measurements, especially the M-L diameters taken with caliper gauge.
- Supply a profile tracing from axilla to feet. Please check that tracing matches caliperdiameters.
- Plaster molds of each extremity are required
 - Maintain ankle joint in neutral position for low heel shoe.
 - Correct ankle inversion or eversion as much as possible
 - Reduce knee valgus or varus
 - Use a right angle casting board

- When a plastic pelvic band is desired, refer to special casting suggestions in the RGO Fabrication Manual.

RGO Options

Cable Type

- Horizontal Cable Dual Cable
 Rocker Bar (Metal pelvic band section only)

Pelvic Section

- LSO Shell Metal Band

Uprights

- Single Double

Hip Joints

- Regular Thrust Bearing Hip Joints
 Abduction Hip Joints
 Non-abduction Hip Joints
- Hip Joint Sizes**
- Small ($\frac{3}{16} \times \frac{5}{8}$)
 Medium ($\frac{1}{4} \times \frac{13}{16}$)
 Large ($\frac{5}{16} \times \frac{7}{8}$)

Knee Joint

- Fillauer Cam Lock
 Drop Locks Bail Lock
 Other _____

Knee Joint Bar Size

- $\frac{3}{16} \times \frac{5}{8}$ $\frac{3}{16} \times \frac{3}{4}$ $\frac{1}{4} \times \frac{3}{4}$

Heel Height

- 0 in. 1/4 in. 1/2 in.
